

Seminars in Oncology: 1st sem 2023

Online via Teams

15/09/2022 (seminar)
Thursday 17h-18h

Exploring metabolic vulnerabilities in muscle deregulated homeostasis. Implication for cancer
Dr. Berardi (VIB-KU Leuven Center for Cancer Biology)

8/12/2022 (seminar)
Thursday 17h-18h

Outcomes in pancreatic cancer surveillance program for carriers of germline CDKN2A pathogenic variants
Prof. dr. Monique van Leerdam (Nederlands Kanker Instituut/Antoni van Leeuwenhoek en Leids Universitair Medisch Centrum) and Dr. Derk Klatte (Leids Universitair Medisch Centrum)

12/01/2023 (seminar)
Thursday 17h-18h

Cancer cell states recur across tumor types and form specific interactions with the tumor microenvironment
Dalia Barkley and Prof. Itai Yanai (Institute for Computational Medicine, NYU Langone Health, New York, USA)

26/01/2023 (seminar)
Thursday 17h-18h

Outcomes in Pancreatic Cancer Surveillance Program for Carriers of Germline CDKN2A Pathogenic Variants
Dr. Derk Klatte and Prof. Monique van Leerdam (Leiden University Medical Center, The Netherlands)

2/03/2023 (seminar)
Thursday 17h-17h30

Microfluidics for Precision Oncology
Prof. Jérôme Charmet (University of Warwick, UK and HE-Arc Ingénierie, Switzerland)

9/03/2023 (seminar)
Thursday 17h-18h

Breast cancer screening or treatment: what's the impact on survival?
Prof. Em. Guy Storme (Dept of Radiotherapy, UZ Brussel)

15/06/2023 (seminar)
Thursday 17h-18h

PIPAC en HIPEC in colorectaal carcinoom
Prof. Wouter Willaert (Department of Gastro-Intestinal Surgery, UZ Gent)

29/06/2023 (seminar)
Thursday 17h-18h

$\gamma\delta$ T cells are effectors of immunotherapy in cancers with HLA class I defects
Joris van de Haar (Netherlands Cancer Institute, The Netherlands)

Accreditation has been applied only for the **seminars**.
